Special Issue of Administrative Sciences

"Advances in Sustainable Entrepreneurship"

Guest Editor:

Jacob Hörisch, Alanus University

jacob.hoerisch@alanus.edu

Sustainable Entrepreneurship has the potential to contribute to the solution of environmental and social problems through entrepreneurial activity. Thereby, it aims at societal transitions towards more sustainability. Despite the enormous potential of sustainable entrepreneurship, the academic debate in this field has just begun to evolve, and, consequently, more research to advance the concept of sustainable entrepreneurship is needed.

With reference to Dean and McMullen (2007, p. 58), sustainable entrepreneurship can be defined as an innovative "process of discovering, evaluating, and exploiting economic opportunities that are present in market failures which detract from sustainability". It is not distinct from phenomena such as social and environmental entrepreneurship, but offers a sustainability perspective on these concepts (Thompson et al., 2011) and is therefore not restricted to profit-oriented organizations.

Among the papers published in the field of sustainable entrepreneurship, only a few quantitative analyses and literature reviews can be found, but there is also need for more qualitative, conceptual, and theoretical advances on sustainable entrepreneurship.

The Special Issue aims at addressing this need for high quality research on sustainable entrepreneurship. It welcomes contributions on the following non-conclusive list of topics:

Sustainable entrepreneurship and innovation

- Financing sustainable entrepreneurship
- Entrepreneurial growth
- Characteristics of sustainable entrepreneurs
- Theories in sustainable entrepreneurship
- o Links and (dis)similarities to sustainability management
- Sustainable entrepreneurship and public policy
- Evaluating sustainable ventures
- o Transformative aspirations of sustainable entrepreneurship
- Sustainable entrepreneurship and stakeholder theory
- Sustainable business models
- Literature reviews on sustainable entrepreneurship
- 0

...

Submissions addressing further issues related to sustainable entrepreneurship (including transdisciplinary approaches) are explicitly welcome.

For further information on the Special Issue, please visit <u>http://www.mdpi.com/journal/admsci/special_issues/Entrepreneurship</u> or contact Jacob Hoerisch (Jacob.hoerisch@alanus.edu).

Submission

Deadline for manuscript submissions: 15 August 2015

Please note: Even though "Administrative Science" is an open access journal, no article processing charges (APC) apply for submissions to this Special Issue.

Administrative Sciences (ISSN 2076-3387) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on organization studies. Administrative Sciences aims to advance and communicate knowledge concerning organization theory, strategic management, public administration as well as interdisciplinary research in related fields and their implications on management, organizations and the society.

For more information, please visit: http://www.mdpi.com/journal/admsci/editors

Manuscripts should be submitted online at <u>www.mdpi.com</u> by registering and logging in to this website. Research articles, review articles as well as communications are invited.
